EDUCATION

Rutgers University–New Brunswick

Aug 2024 – Expected May 2028

B.S. Data Science & Economics; Minor in Computer Science

Coursework: Data Structures, Discrete Structures, Intro to Computer Science, Data Management for Data Science, Inference for Data Science, Intro to Data Science, Linear Algebra, Calculus II, Statistics I, Econometrics

TECHNICAL SKILLS

Languages & Data: Python, SQL, R, Java, HTML/CSS/JavaScript; Databricks, SQLite

Machine Learning: PyTorch, scikit-learn, XGBoost, pandas, NumPy, Matplotlib, NLTK (VADER)

AI & Automation: n8n, REST APIs, Slack bots, Telegram bots, text-to-speech APIs, Claude, Codex, Cursor

Tools & Compute: Git, GitLab, Jupyter, VS Code, Amarel HPC (SLURM, GPU), Jira, Figma

EXPERIENCE

Agoda

Bangkok, Thailand

Commercial Operations & AI Automation Intern

Jun – Aug 2026

- Built Python/SQL checks comparing inventory across partner platforms such as Booking.com and Priceline with eligibility rules, plus a Slack bot with review rows, editable templates, and email/Slack notifications.
- Configured a three-bot Slack workflow for FAQs, internal research, and Jira escalation using hosted AI tools; turned stakeholder interviews into routing and human-review rules.
- Participated in non-production validation with 504 passing automated tests; used Git/GitLab and AI coding tools; delivered a weeklong handover. Both tools went live in Aug 2026.

BuzzeBees

Bangkok, Thailand

Data Scientist Intern

Jun – Aug 2025

- Wrote Databricks SQL queries joining Facebook ad spend and engagement with Shopee/Lazada commissions and orders; engineered CTR, CPC, ROAS, and ROI features and missing-data flags.
- Prototyped an early XGBoost revenue-prediction model with pandas and scikit-learn and handed it to a senior colleague.
- Facilitated meetings with Omnisient, an international AI client, to clarify dataset suitability, scope, and partner approvals.

Consulting Firm (Financial Services Client)

Bangkok, Thailand

System Implementation / Project Manager Assistant Intern

Jul 2023

- Supported a Dynamics AX-to-Dynamics 365 data migration of about 500,000 records by reviewing data-format differences and proposing script-based transformation rules.

PROJECTS

DeepLOB Research Extension – Rutgers Quant Finance Club [GitHub]

Feb – May 2026

- Expanded a paper replication into 95 experiments (CNN, LSTM, Transformer vs. logistic-regression and XGBoost baselines; five horizons; four cost-aware losses) in a PyTorch pipeline on Rutgers Amarel HPC (SLURM, GPU).
- Ran spread-cost backtests showing higher accuracy did not consistently improve simulated returns; report submitted to the Rutgers Quant Finance Club.

News & Audio Briefing Automation – n8n, REST APIs, Telegram

Feb 2026 – Present

- Built a scheduled n8n workflow that delivers finance and tech news summaries, source links, images, and text-to-speech audio to Telegram every weekday morning.
- Compared text-to-speech tools and tuned narration tone, balancing engaging delivery with accuracy on financial content.

Mini Portfolio Risk Monitor – Python, SQLite, scikit-learn [GitHub]

Sep – Dec 2025

- Built an ETL pipeline pulling stock prices (yfinance) and news (API) into SQLite; engineered rolling price and news-sentiment (VADER) features.
- Trained logistic regression for next-day downside risk; evaluated with time-ordered splits and precision-recall.

LEADERSHIP & ACTIVITIES

Rutgers Road to Silicon Valley – Top 20 finalist (Oct 2025) with Dip, a ride-pooling app concept I originated

Rutgers Clubs: Quant Finance Club, International Student Association, Chinese Student Association, Tennis, Pickleball

AFS Intercultural Exchange: represented Thailand as an exchange student in Pennsylvania (2022–23)
