EDUCATION

Rutgers University–New Brunswick

Aug 2024 – Expected May 2028

B.S. Data Science & Economics; Minor in Computer Science

Coursework: Data Structures, Discrete Structures, Intro to Computer Science, Data Management for Data Science, Inference for Data Science, Intro to Data Science, Linear Algebra, Calculus II, Statistics I, Econometrics

EXPERIENCE

Agoda

Bangkok, Thailand

Commercial Operations & AI Automation Intern

Jun – Aug 2026

- Built Python/SQL checks that compared partner-platform inventory and applied eligibility rules, plus a Slack bot with review rows, editable templates, and email/Slack notifications; debugged incorrectly flagged records.
- Configured a three-bot Slack workflow for FAQs, internal research, and Jira escalation using hosted AI tools; turned stakeholder interviews into routing and human-review rules.
- Participated in non-production validation with 504 passing automated tests; used Git/GitLab and AI coding tools (Claude, Cursor), and delivered a weeklong handover on system logic.

BuzzeBees

Bangkok, Thailand

Data Scientist Intern

Jun – Aug 2025

- Wrote Databricks SQL queries joining Facebook ad spend and engagement with Shopee/Lazada commissions and orders; engineered CTR, CPC, ROAS, and ROI features and missing-data flags.
- Prototyped an XGBoost revenue-prediction model with pandas and scikit-learn; analyzed feature importance and handed the work to a senior colleague.
- Facilitated meetings with an international AI client to clarify dataset suitability, scope, and partner-approval requirements.

Consulting Firm (Financial Services Client)

Bangkok, Thailand

System Implementation / Project Manager Assistant Intern

Jul 2023

- Supported a Dynamics AX-to-Dynamics 365 data migration of about 500,000 records by reviewing data-format differences and proposing script-based transformation rules.

PROJECTS

DeepLOB Research Extension – Rutgers Quant Finance Club [GitHub]

Feb – May 2026

- Expanded a paper replication into 95 experiments across seven models, five horizons, and four cost-aware loss functions for price prediction from limit-order-book data.
- Built a configurable PyTorch pipeline (YAML configs) on Rutgers Amarel HPC (SLURM, GPU) comparing CNN, LSTM, and Transformer models to logistic-regression and XGBoost baselines.
- Ran spread-cost backtests showing higher accuracy did not consistently improve simulated returns; documented limits.

Mini Portfolio Risk Monitor – Python, SQLite, scikit-learn [GitHub]

Sep – Dec 2025

- Built an ETL pipeline pulling stock prices (yfinance) and news (API) into SQLite; engineered rolling price and news-sentiment (VADER) features.
- Trained balanced logistic regression for next-day downside risk; evaluated with chronological splits and precision-recall.

News & Audio Briefing Automation – n8n, REST APIs, Telegram

Feb – Apr 2026

- Built a scheduled n8n workflow delivering daily news summaries, source links, images, and text-to-speech audio briefings.

AI-Assisted Daily Planner – Canvas, Google Calendar, Slack, Sheets

Sep 2026 – Present

- Integrates coursework, deadlines, and tasks with Slack reminders and reading-to-audio conversion.

SAT Tutoring Prototype – 4-person team

Jan – Apr 2026

- Designed SAT learning flows for practice, vocabulary, daily quizzes, and AI-guided help.

Rutgers Hackathon – HTML, CSS, JavaScript

Oct 2024

- Co-built browser-based memory games with a simple interface for people living with dementia.

LEADERSHIP & ACTIVITIES

Rutgers Road to Silicon Valley – Top 20 finalist (Oct 2025) with Dip, a ride-pooling app concept I originated

Rutgers Clubs: Quant Finance Club, International Student Association, Chinese Student Association, Tennis, Pickleball

AFS Intercultural Exchange: represented Thailand as an exchange student in Pennsylvania (2022–23)

SKILLS

Programming: Python, SQL, R, Java, HTML/CSS/JavaScript

ML & Data: PyTorch, scikit-learn, XGBoost, pandas, NumPy; classification, regression, feature engineering, backtesting

Tools: Git/GitLab, Databricks, SQLite, Jupyter, VS Code, Amarel HPC (SLURM, GPU), n8n, Slack, Jira, Figma
