EDUCATION

Rutgers University–New Brunswick

Aug 2024 – Expected May 2028

B.S. Data Science & Economics; Minor in Computer Science

EXPERIENCE

Agoda

Bangkok, Thailand

Commercial Operations & AI Automation Intern

Jun – Aug 2026

- Built SQL checks to automate manual commercial reviews, finding inventory gaps across partner platforms such as Booking.com and Priceline, plus a Slack flow to approve opportunities and notify account managers.
- Gathered requirements through stakeholder interviews for a three-bot Slack support workflow (FAQs, internal research, Jira escalation); refined routing and human-review rules over four design iterations.
- Revised business rules after manager feedback; supported testing (504 passing tests), wrote process documentation, and ran a weeklong handover. Both tools went live in Aug 2026.

BuzzeBees

Bangkok, Thailand

Data Scientist Intern

Jun – Aug 2025

- Facilitated English-language meetings with Omnisient, an international AI client, coordinating with product and data-science teams on dataset suitability, scope, and partner approvals.
- Joined Facebook ad spend with Shopee/Lazada orders in SQL to track marketing KPIs (CTR, CPC, ROAS, ROI).
- Built an early revenue-prediction model to guide ad-boost budget decisions; handed off to a senior colleague.

Consulting Firm (Financial Services Client)

Bangkok, Thailand

System Implementation / Project Manager Assistant Intern

Jul 2023

- Supported an ERP data migration (Microsoft Dynamics AX to Dynamics 365) of about 500,000 records by reviewing data-format differences and proposing script-based transformation rules.
- Helped present the sprint-based implementation roadmap to the client's GM and senior technical staff.

LEADERSHIP & ENTREPRENEURSHIP

Rutgers Road to Silicon Valley Pitch Competition

New Brunswick, NJ

Top 20 Finalist – Dip, student ride-pooling startup concept (3-person team)

Oct 2025

- Originated the pivot from a subleasing idea to Dip after questioning its supply/demand fit; designed how students join rides with drivers already commuting between campuses.
- Ran a student survey on commute problems and Uber/Lyft spending (36% paid \$11–\$20 per ride) to support a low-cost pricing strategy against ride-share competitors.
- Co-built a clickable Figma prototype and co-presented a 23-slide pitch covering market research, payment flow, safety rules, and a 12-month campus rollout plan.

Rutgers Clubs: Quant Finance Club, International Student Association, Chinese Student Association, Tennis, Pickleball

AFS Intercultural Exchange: represented Thailand as an exchange student in Pennsylvania (2022–23)

PROJECTS

News & Audio Briefing Automation – n8n, APIs, Telegram

Feb 2026 – Present

- Built an automated workflow sending finance and tech news summaries with audio briefings to Telegram each weekday.
- Evaluated text-to-speech tools and tuned narration for clarity, balancing engaging delivery with accuracy.

Mini Portfolio Risk Monitor – Python, SQL

Sep – Dec 2025

- Combined stock prices and company news sentiment in a SQL database to flag stocks at risk of a next-day drop.
- Tested a logistic-regression model with time-ordered splits; documented baselines and limitations.

Trading Strategy Research (DeepLOB) – Rutgers Quant Finance Club

Feb – May 2026

- Ran 95 experiments comparing seven models for short-term stock-price prediction on a university GPU cluster.
- Backtests with trading costs showed higher accuracy did not mean higher returns; report submitted to the club.

SKILLS

Business: Requirements gathering, stakeholder interviews, process design, testing, documentation, market research, KPIs

Tools: Excel, SQL, Python, Jira, Slack, Databricks, n8n, Figma, Canva, Dynamics 365, Power Automate

AI Tools: Claude, Codex, Cursor (AI-assisted development and automation)
